EMPLOYMENT HISTORY

Frontend Engineer, Solve

Sep 2024 — Nov 2024

- Spearheaded application modernization by transforming legacy C# components into React, resulting in a 45% performance boost and 30% reduction in code complexity through strategic component modularization
- Engineered mobile-responsive layouts that drove a 30% increase in user satisfaction, while implementing advanced code splitting techniques that reduced page load times by 35%
- Implemented ag-Grid data visualization solution handling 1000+ records, achieving 40% faster data rendering and establishing comprehensive error handling protocols
- Architected and deployed CI/CD pipeline that reduced deployment time by 50%, while maintaining 95% on-time delivery rate for critical project milestones

Frontend Engineer, Hordanso

May 2024 — Oct 2024

- Architected high-performance web application using React and TypeScript, implementing Redux state management that reduced data fetch latency by 40%
- Designed microservices-based architecture that enhanced system modularity, creating reusable React components that improved user interaction efficiency by 80%
- Implemented comprehensive testing strategy using Cypress, achieving 90% test coverage and reducing post-deployment issues by 50%
- Developed responsive UI components following mobile-first principles, resulting in 90% increase in cross-device user engagement

Frontend Engineer, AfricanPlan Foundation

Feb 2024 — Apr 2024

- Led end-to-end UI/UX redesign initiative that increased user satisfaction by 40% and decreased bounce rates by 35% across all devices
- Optimized API integration using Axios, achieving 50% faster data retrieval and 60% reduction in bug resolution time
- Engineered React-based responsive application that drove 80% increase in user engagement and 90% growth in mobile conversions
- Delivered 100% of project milestones while maintaining strict quality standards and meeting all business requirements

EDUCATION

University of Nigeria Nsukka (UNN), Bsc

Sep 2018 — Nov 2022
